

Abstract:

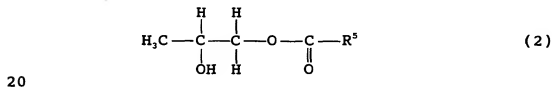

An inorganic particle-containing composition comprising:

- (A) inorganic particles;
- 5 (B) a binder resin; and
- (C) at least one plasticizer selected from the group consisting of compounds represented by the following formula (1):

wherein R^1 and R^4 are the same or different alkyl groups having 1 to 30 carbon atoms or alkenyl groups, R^2 and R^3 are the same or different alkylene groups having 1 to 30 carbon atoms or alkenylene groups, m is an integer of 0 to 5, and n is an
 15 integer of 1 to 10,

and compounds represented by the following formula (2):

wherein R^5 is an alkyl group having 1 to 30 carbon atoms or alkenyl group.

A transfer film and a plasma display panel production process using the composition are also described.
